PROPERTY DETAILS REPORT — PROPERTY A

Fictional example: Cedar Residency, Flat A-204 | Hyderabad, Telangana

1. Property overview

This report describes a fictional residential apartment prepared for demonstrating a Real Estate Document Intelligence and Retrieval-Augmented Generation (RAG) application. It is not an advertisement, valuation, ownership certificate, or verified property record.

Property reference: PROP-A-204. **Property type:** 2-bedroom apartment. **Building:** Cedar Residency. **Unit:** A-204, second floor. **Illustrative location:** a residential neighborhood in Hyderabad, Telangana.

The apartment is represented as having a carpet area of 1,020 square feet, a built-up area of 1,200 square feet, and an approximate super built-up area of 1,350 square feet. These area types are different and should not be treated as interchangeable. A real transaction should use the definitions and measurements in verified records.

2. Layout and room information

The fictional layout includes two bedrooms, two bathrooms, a living and dining area, a kitchen, a utility balcony, and one small balcony connected to the living room. The room arrangement is intended to support a small household or two working professionals.

- Living and dining area: approximately 260 sq. ft., with space for seating and a dining table.
- Main bedroom: approximately 145 sq. ft., with an attached bathroom.
- Second bedroom: approximately 120 sq. ft., suitable as a bedroom or work-from-home room.
- Kitchen: approximately 90 sq. ft., with a separate utility area.
- Bathrooms: two, with illustrative standard fittings.

3. Building and shared facilities

The fictional building is described as a mid-rise apartment complex with lift access, a common entrance, staircases, corridor lighting, a security desk, and a shared water-storage system. Residents are expected to follow the building's written rules for use of common areas.

Shared facilities in this example include one allocated car parking space, two-wheeler parking subject to availability, a common waste collection point, and a small landscaped courtyard. The existence, condition, and availability of facilities must be checked in person for any real property.

Important notice: All names, measurements, facilities, and location descriptions in this document are fictional and created only for software testing. Verify real property facts and obtain professional advice where required.

4. Utilities and condition

The sample apartment is assumed to have electricity connections, municipal water supply supplemented by a building storage tank, drainage, and internet service availability from local providers. Individual service availability and charges can vary by provider and building.

The illustrative interior condition is described as generally serviceable, with painted walls, tiled flooring, standard doors and windows, and ordinary kitchen fittings. This description is not based on a physical inspection and must not be used as proof of condition.

Before occupancy, a tenant or buyer should test taps, drains, switches, sockets, door locks, windows, ventilation, water pressure, and any appliances included in the transaction. Existing damage should be photographed and documented in a signed inventory.

5. Access, location, and neighborhood

The fictional building is located in a mixed residential area with access to grocery shops, pharmacies, public transport routes, and everyday services. No specific travel time or distance is represented as verified.

Potential residents should evaluate road access, peak-hour traffic, noise, street lighting, flood or waterlogging history, parking access, public transport, and proximity to work or educational institutions. Visit the location at different times of day when possible.

6. Documents to verify

Before buying or renting a real property, request and independently verify relevant records, which may include title documents, the registered sale deed or prior conveyance documents, encumbrance certificate where applicable, approved building plan, occupancy/completion certificates where applicable, property-tax receipts, utility bills, and the association's rules.

Check that the property description, unit number, floor, area, owner or landlord identity, and any parking allocation are consistent across records. For legal or title questions, consult a qualified local professional rather than relying solely on a summary generated by software.

Important notice: All names, measurements, facilities, and location descriptions in this document are fictional and created only for software testing. Verify real property facts and obtain professional advice where required.

7. Illustrative key facts

Property ID: PROP-A-204
Configuration: 2 BHK
Carpet area: 1,020 sq. ft. (illustrative)
Built-up area: 1,200 sq. ft. (illustrative)
Super built-up area: 1,350 sq. ft. (illustrative)
Floor: Second floor
Parking: One illustrative allocated car space
Occupancy status: Not specified in this sample

8. Questions for follow-up

Useful questions for a document-intelligence system include: What is the carpet area? Is parking included? Which documents establish the owner's title? What recurring charges apply? Are there restrictions on pets, subletting, or alterations? Which facts are explicitly stated and which remain unknown?

The system should answer only from retrieved text, distinguish stated facts from assumptions, and identify missing or conflicting information. For this report, all property facts are illustrative and should be labelled as sample data in any user interface.

9. Data quality and recordkeeping

Each uploaded file should be assigned a property ID, document type, upload date, and source filename. Extracted text should retain page numbers where possible so answers can cite the page or section from which a fact was retrieved.

For a production application, access controls should prevent one user's private documents from appearing in another user's results. The application should also provide a deletion workflow and avoid logging confidential personal information unnecessarily.

Important notice: All names, measurements, facilities, and location descriptions in this document are fictional and created only for software testing. Verify real property facts and obtain professional advice where required.
